

### Information for impact

As a volunteer organization, the Public Health Foundation, Bangladesh (PHFBD) has only one KPI – “IMPACT”- followed in our endeavors. Based on this simple but effective philosophy, we have organized a valuable gift for all public health professionals to mark an impact in their careers.

It is popularly said that “Information is power”, and we believe so. Remember, this is primarily a data-driven era. Therefore, being updated with the data and information poses an immense influence on one’s life. PHFBD, as a public health-focused entity, intends to serve emerging public health professionals by providing necessary information that helps them be enlightened and enriched personally and professionally. We believe this organized information is an impactful gift for any health professional who wants to know the facts and evidence-based work.
